

● DIGITAL ENGINEERING STUDIO

# PROJECT QUOTATION

Engineering proposal for a unified high-performance mobile application ecosystem (iOS & Android), a custom corporate website, and a high-fidelity visual design system.

PREPARED FOR

**Prospective Partner**

ESTIMATED VALUE

**₹90,000 INR (All-Inclusive)**

## 03 // ROADMAP &amp; RELEASE CYCLE

# CONCURRENT RELEASE PIPELINE

To maximize engineering velocity, the web and mobile development pipelines will proceed concurrently in parallel tracks.

W2-3

**MILESTONE 1: WEB GO-LIVE**

Custom corporate website designed, built, and launched live on production edge servers. Fully operational.

M1.5

**MILESTONE 2: APP V1 COMPLETION**

Frontend core mobile app (iOS & Android) completed (1.5 months). Build package compiled and submitted to store queues.

M2.0

**MILESTONE 3: UI DESIGN INTEGRATIONS**

Incorporating deep custom designs and layouts. Project development timelines extend up to 2 months for customized designs.

+2W

**MILESTONE 4: APP V2 DEPLOYMENT**

App Version 2 (V2) completed and released exactly 2 weeks after initial V1 launch, bringing second-level feature iterations.

+4W

**MILESTONE 5: APP V3 DEPLOYMENT**

App Version 3 (V3) finalized and shipped to stores in the next 2 weeks (4 weeks post V1), delivering the polished scope.

04 // ESTIMATE SUMMARY

# INVESTMENT BREAKDOWN

A transparent fee structure built to eliminate recurring agency fees or license markups.

ANDROID & IOS APP

Cross-platform development.

₹65,000

CUSTOM WEBSITE

React/Next.js live ecosystem.

₹15,000

UI/UX DESIGN

Interactive vector designs.

₹10,000

TOTAL ONE-TIME INVESTMENT

₹90,000 **INR**

Equivalent to 1 month's salary of a single staff member to own a permanent lifetime asset.

05 // INCLUDED FREE ADD-ONS (EARLY CUSTOMER BONUS)

1 YEAR FREE MAINTENANCE

Includes third-party package security patches, core package updates, cloud edge deployments checks, and minor adjustments free for 12 months.

FREE APP SEO & OPTIMIZATION

Full search engine indexing setup, Lighthouse performance score tunings, metadata generation, and store visibility optimization compiled out-of-the-box.

## 06 // POLICIES &amp; LEGAL

# SCOPE MANAGEMENT RULES

Standard operational guidelines structured to ensure smooth parallel development timelines.

## 01 // FULL CODE & ACCESS OWNERSHIP

We transfer 100% intellectual property ownership of the complete codebase to the client upon final milestone payment. You will receive complete Git source repository access, server host configurations, deployment dashboard logins, and secure access credentials. We keep no licenses and charge no licensing fees.

## 02 // TWEAKS & CUSTOMIZATION LIMITS

To prevent scope creep and maintain the launch schedules, the project is governed by the following tweak policies:

- **Medium-Level Tweaks (Included):** Unlimited layout shifts, textual changes, button configurations, color switches, and font swaps are handled freely anytime during active sprints.
- **Advanced-Level Customizations (Capped):** Major changes to architectural design, changing third-party system dependencies, or rewritten databases are capped at 20-30% of the initial codebase. Anything exceeding this threshold will require a separate change order assessment.

## 03 // COMMERCIAL & TERMS SLA

- **Payment Schedule:** 50% advance to initiate the parallel sprint lines, 25% upon website launch, and 25% upon App V1 completion.
- **Infrastructure Bills:** Client is billed directly by cloud host providers (AWS/Vercel/Supabase). We maintain frontend deployments but database fees remain client's direct cost.
- **App Store approvals:** Store reviews depend on Google/Apple queue velocity. We assist in resolving review issues, but timeline estimates exclude store queue wait times.
